PROJECTS

EMPLOYEE LEAVE MANAGEMENT mar 2023-Apr 2023

- **ABSTRACT:** Leave Employment Management is a system designed to streamline and automate employee leave requests, approvals, and tracking within an organization. It enhances efficiency by reducing manual processes, ensuring compliance with company policies, and providing real-time leave status updates.
- **OUTCOME:** The system improves workforce productivity, minimizes administrative workload, and ensures transparency in leave management, leading to better resource planning and employee satisfaction.

- **ABSTRACT:** A Food Ordering System with Invoice Generator built using Java enables users to browse menus, place orders, and receive automated invoices.
- **OUTCOME:** The system improves efficiency, accuracy, and customer satisfaction by automating order management and invoice generation, reducing manual errors, and ensuring a smooth transaction process.
